

HOW TO DEFOG A CAR WINDSCREEN & STOP CONDENSATION IN WINTER

1. MAKE SURE YOUR CAR HEATER IS BEING UTILISED, SET IT TO MAXIMUM POWER AND DIRECT THE AIRFLOW TO THE WINDSCREEN.

2. USE YOUR REAR WINDOW HEATER TO QUICKLY CLEAR FOG FROM THE REAR WINDOW.

3. SWITCH ON THE AIR CONDITIONING TO DEHUMIDIFY THE AIR INSIDE THE CAR.

4. OPEN THE WINDOWS SLIGHTLY TO ALLOW COLD AIR TO BALANCE TEMPERATURES AND REDUCE FOGGING.

5. REMOVE GRIME TO PREVENT CONDENSATION BUILD-UP BY CLEANING YOUR WINDOWS REGULARLY.

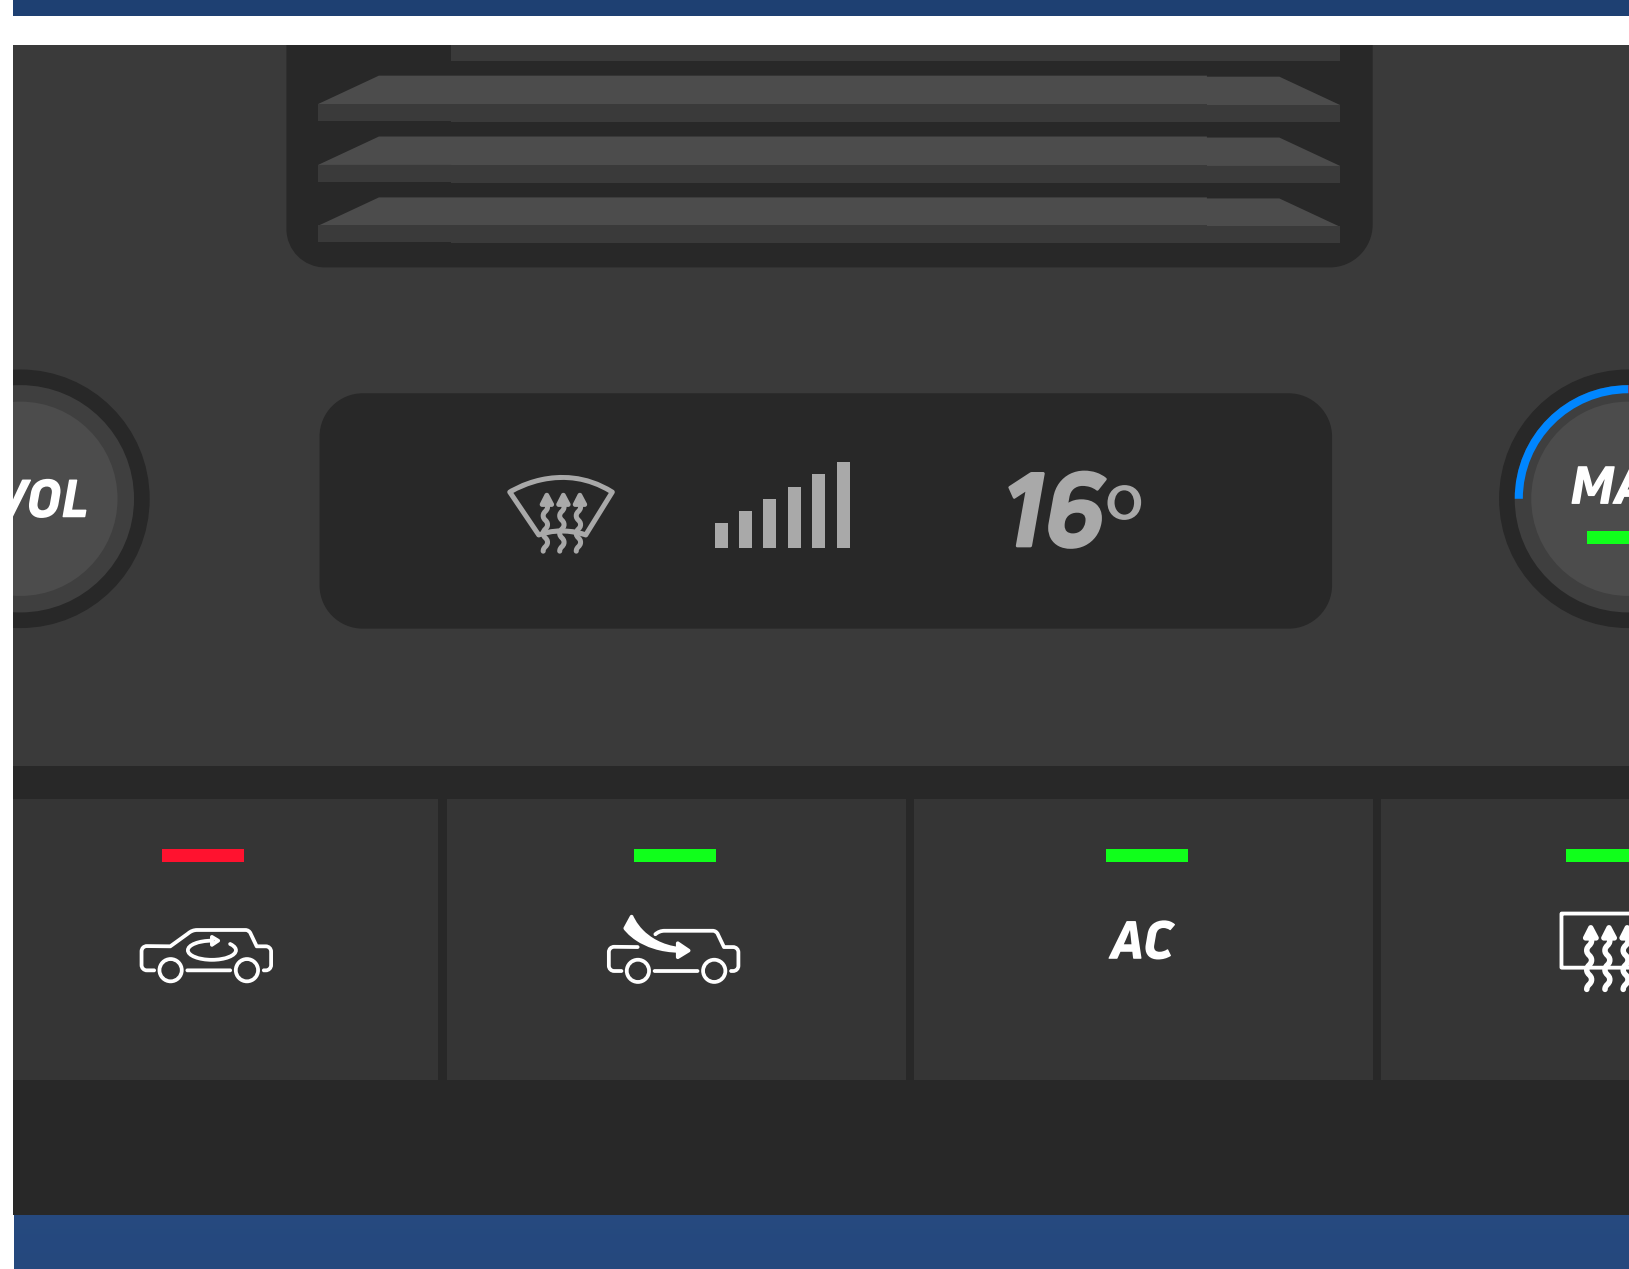

6. PLACE DEHUMIDIFYING PODS IN YOUR CAR TO ABSORB EXCESS MOISTURE.

7. INSPECT DOOR AND WINDOW SEALS FOR POTENTIAL MOISTURE ENTRY, CHECKING FOR LEAKS.

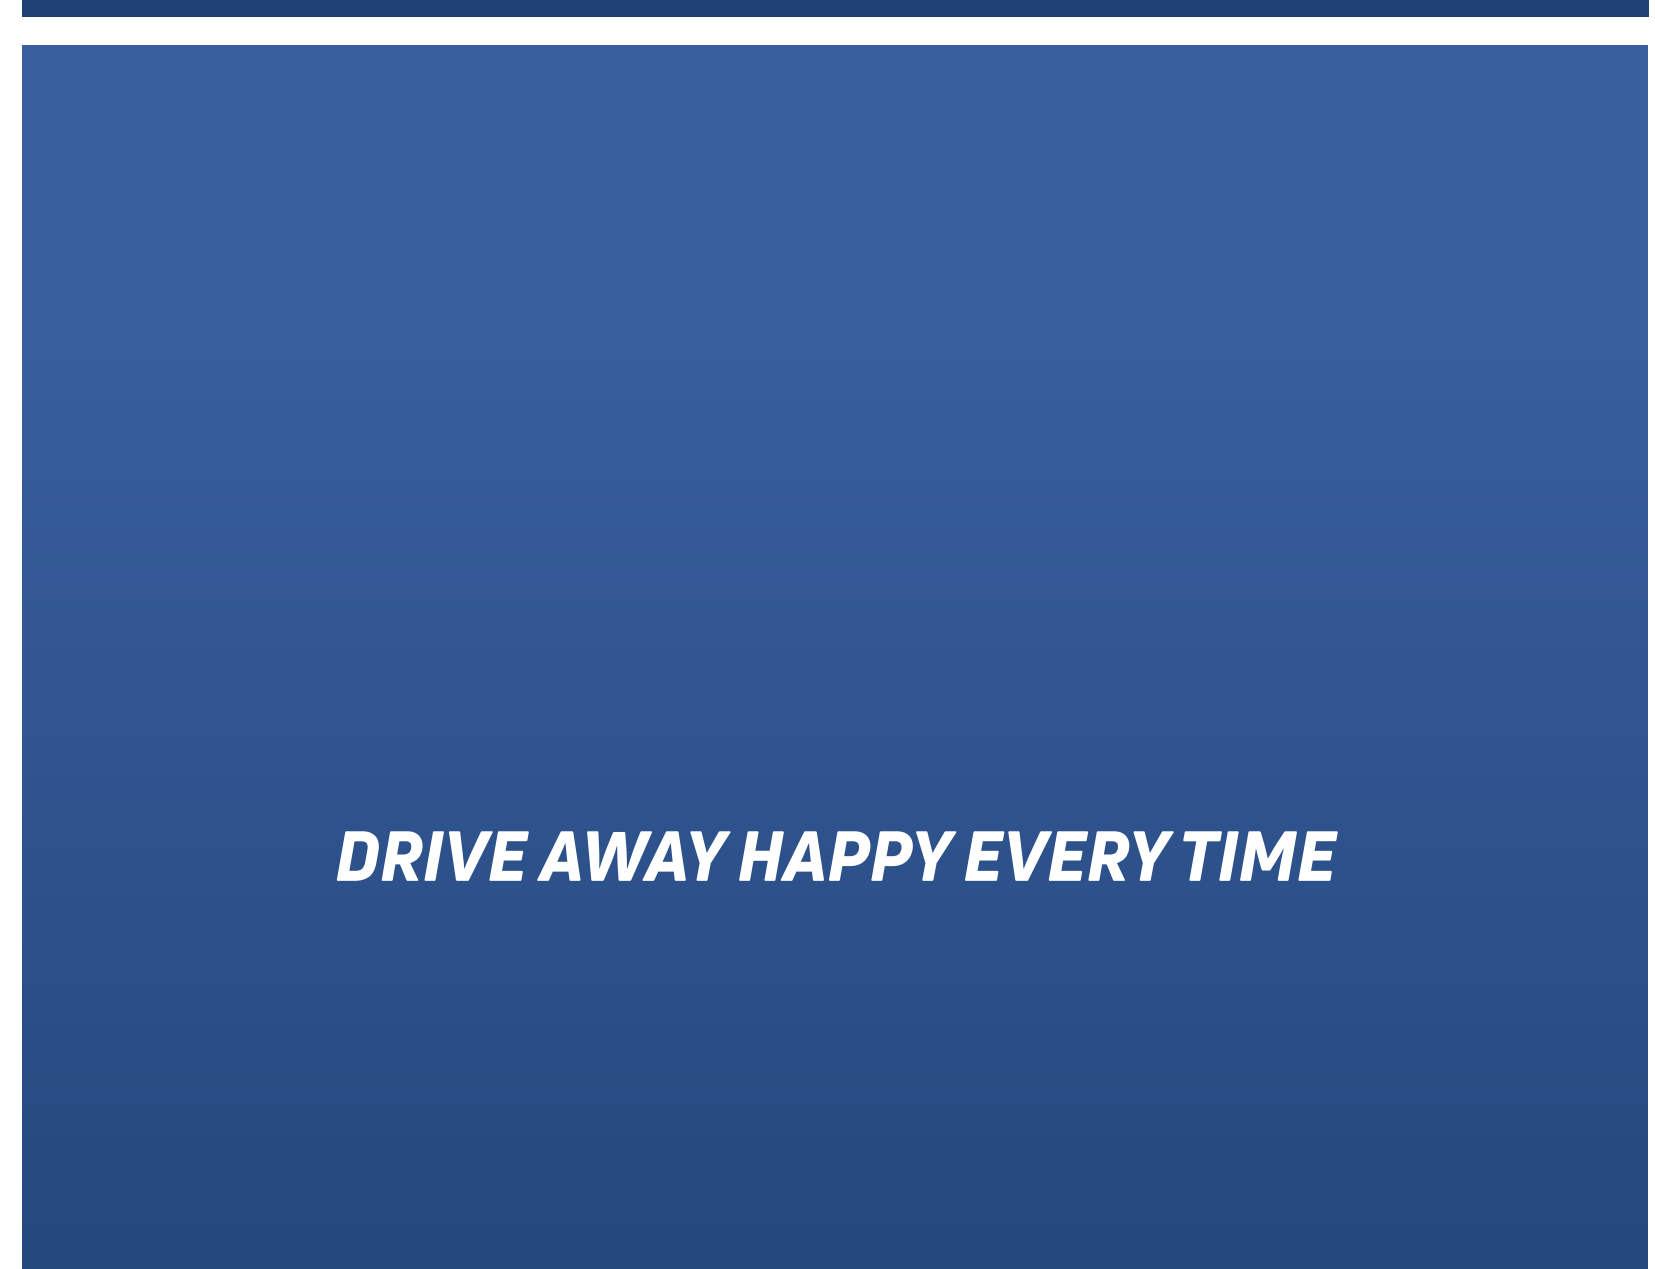

8. LEAVE DAMP CLOTHES OR SHOES OUTSIDE THE CAR.

9. KEEP THE RECIRCULATION SETTING OFF. USE FRESH AIR MODE TO REDUCE HUMIDITY INSIDE.

10. START THE ENGINE EARLY TO WARM THE INTERIOR AND PREVENT FOGGING.
